

RADIUS METHOD

Secure, Scalable, Mission-Driven
Building AI-Enabled Software Superiority for the
Future Fight

Built by GovTech, AI, and Security Experts

 Software engineers with hundreds of years of experience from the startup world.

 Proven defense execution with contract vehicles and FCL.

 Startup-driven culture—fast execution, lean operations, and results-focused.

 **Thought Leadership + Trusted Partners + Deployment Experts**

Danny Gershman, Founder and CEO

The Problem: Shadow AI

- **Unauthorized, unmonitored use of AI tools by employees**
 - Developers pasting code into ChatGpT, using personal Claude API keys
- **It's a "spill", not a "leak"**
 - Employees are trying to be more productive, but data leaves security perimeter without visibility or control
- **40%+ of employees use AI tools at work**
 - Even when policy prohibits it; banning just drives usage underground
- **Organizations need visibility, approved alternatives, and tools to govern**
 - Employees need enablement and secure tools that meet productivity needs

Our Solution: ModSecOps & Crystal Tower™

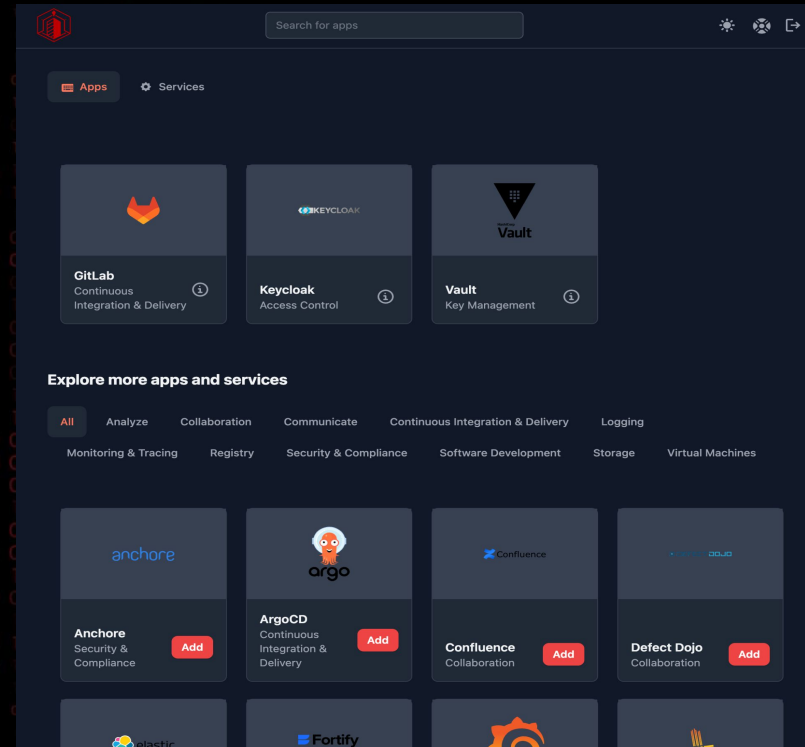

CRYSTAL
TOWER

- **ModSecOps (Model Security Operations):**
 - The evolution of DevSecOps for AI - securing not just code, but the AI systems and data
 - Zero Trust philosophy for AI - assume models could be compromised; build layered defenses with visibility and control
 - Channel all AI traffic through a single control point - gain visibility, enforce guardrails, and manage costs
- **Crystal Tower™ delivers ModSecOps (TRL 6, up to IL6)**
 - Visibility - see who's using AI, what data is flowing, and where it's going
 - Control - enforce policies, block sensitive data exfiltration, and provide approved AI access
 - Governance - virtual keys per user, cost management, logging, and compliance-ready audit trails

Proven Performance - Air Force Mod & Sim Platform

- Environment-agnostic
 - Currently deployed to AWS-GovCloud, on-prem, IL4/5/6, air-gapped networks, ATO
- Modular by Design
 - Legacy & modern applications
 - AI-augmented DevSecOps (ModSecOps)
 - Built with reusable Terraform/Ansible stacks
- Secure to the Core
 - Zero Trust baked in, post-quantum ready
 - Automated security controls
 - Hardened Iron Bank containers and Big Bang Kubernetes Baseline
- Repeated delivery within DoD software factories (Kessel Run, 5GAT, PEO STRI, AI2C)

Dashboard of live, production Crystal Tower™ instance

Other experience - Air Force

- Kessel Run - Air Force Software Factory
 - Continuous support since 2019 across Cyber, DevSecOps, Cloud, and Platform missions.
 - RM team mbrs led original Cloud Computing and IT Integration Services contract (Cloud CITI) aka All Domain Common Platform
 - Delivered secure, automated pipelines (cATO) and cross-domain solutions (AWS Diode); executed Zero Trust architecture
- Platform One (Big Bang, Iron Bank, Party Bus, CNAP)
 - Anchors on six contracts across all Platform One line of efforts, co-maintainer of the Big Bang DevSecOps platform.
 - Integrated Iron Bank containers and CI/CD pipelines to improve security and deployment efficiency.

KESSELRUN

Other experience - Army

- Artificial Intelligence Integration Center (AI2C)
 - Built Kubernetes-based AI/ML pipelines with Big Bang + K3S
 - Automated model deployment using Terraform and GitOps across Azure and disconnected edge environments.
- Program Executive Office Simulation, Training and Instrumentation (PEO STRI) UnITE Software Factory
 - Migrated legacy simulation app to container-based architecture on Azure Kubernetes Service using Iron Bank and Big Bang.
 - Assisted Microsoft to deploy a specialized Container Networking Interface called WeaveNet to achieve UDP multicast.

KESSELRUN

Other experience

- Test Resource Management Center (TRMC) 5th Generation Aerial Target (5GAT)
 - Crystal Tower™ powers 6DOF simulation on Big Bang/EKS with STIG'd MATLAB on Windows and browser-based access via Apache Guacamole.
 - Enforced Zero Trust using Keycloak/Istio for both North/South and East/West traffic protection.
- Additional services support for:
 - Air Force's LevelUP Unified Platform F-35 Data Mgmt Ops
 - Department of Veterans Affairs OCR and AI/ML Prototype
- Commercial experience
 - SecurityScorecard, The NewsMarket, BlogTalkRadio, BeaconLive

KESSELRUN

We Built What Others Couldn't

- **Proven Execution**: delivered operational systems within failing software factories when the competition couldn't (e.g., RAFT, Defense Unicorns, Second Front, SAIC, BrainGu, and Clarity)
- **Commercial Viability**: we didn't just build a bunch of tools—we executed dual-use mission capabilities
- **Security/AI First Approach**: embedded Zero Trust, quantum encryption, AI security, and compliance from ground up to IL6
- **Built for Scale**: a B2B-ready, mature platform with a balance of emergent design & intentional architecture

Where RM can help - mission-focused, AI modernization

- ModSecOps: AI-Driven Development and Security Overlay
 - Streamlining AI integration, Zero Trust, and compliance across the entire SDLC
- ModSecOps Enablement for Cloud-Native Support
 - Secure AI-driven CI/CD for commercial, classified, cloud, and edge environments.
- Hardening & Modernizing Existing Pipelines
 - Enhancing reliability, security, and compliance of delivery processes without redesign.
- Legacy Replatforming
 - Modularizing legacy applications for containerized deployment in secure environments.
- Pipeline Expansion
 - Scaling application delivery with environment enhancements and improved automation.
- Full-stack Development
 - Frontend and backend expertise to support end-to-end mission application needs.
- UxD/IxD
 - User engagement strategies that inform design and drive measurable outcomes.

Mission Execution Products

SPHERE

Protect Your Business from Cyber Threats

Professional security assessments tailored for small and medium businesses. AI-Enhanced, Human-Powered

SocketZero

Post-Quantum Ready, Stealth Zero Trust Network

Replaces legacy VPNs with secure, tunnel-based architecture—available bundled or standalone for maximum flexibility.

Available in [AWS Marketplace](#)

Mission Execution Products

The logo for LANDMINE is rendered in a bold, red, stylized font. The letters are blocky with some internal cutouts, giving it a technical or industrial appearance. The word is centered horizontally in the upper left quadrant of the slide.

LANDMINE

Breach Detection solution securing both commercial and DoD networks

Real-time breach detection tool that silently alerts on unauthorized access, enabling instant response and threat identification against zero-day attacks

SYPHON FORGE

AI Document Automation for the Federal Enterprise

AI-powered document automation platform prototype accelerating VA form processing and data integration with secure, scalable machine learning and minimal human intervention

Contract Vehicles

GSA MAS

GSA Contract Number: 47OTCA25D002T

Period of Performance: Dec 6, 2024 to Dec 5, 2029

SINS:

54151S - Information Technology (IT) Professional Services

518210C - Cloud and Cloud-Related IT Professional Services

Tradewinds Solutions Marketplace

Crystal Tower™ - AI-Driven Software Development Lifecycle

The Tradewinds Solutions Marketplace is a digital repository of post-competition, readily awardable pitch videos that address the DoW's most significant challenges in AI/ML, data, and analytics.

Platform One Solutions Marketplace

DevSecOps as a Service

The P1 Solutions Marketplace is a digital repository of post-competition, 5-minute long readily-awardable pitch videos, which address the Government's greatest requirements in hardware, software and service solutions.

SHIELD IDIO

Radius Method holds a MDA SHIELD contract with a ceiling of \$151B. Through SHIELD, Radius Method will deliver secure, modern, mission-ready solutions across cloud platforms, cybersecurity & Zero Trust, DevSecOps acceleration, AI/ML-enabled engineering, and enterprise modernization.
